

Enrico Ascalone

## Bronze Age Weights from Mesopotamia, Iran & Greater Indus Valley

*Weight and Value, Bd. 3*

*Herausgegeben vom Seminar für Ur- und Frühgeschichte der Universität Göttingen*

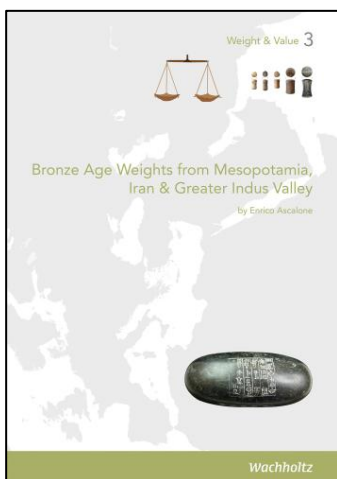

### A presentation and discussion of unpublished weights

In this volume Enrico Ascalone presents more than 2000 weights, potential weights and other objects – mostly unpublished so far – from 20 Bronze Age sites in Iraq, Iran and India. It includes ca. 750 weights from Susa in south-western Iran and nearly 900 weights from Dholavira, Kutch district, in India. The typology, material, archaeological context and metrology of the objects is discussed. For the first time a large number of weights from the Mature Harappan culture is presented in detail. The investigations were made possible by various partners in the Iran, India and France (Louvre) and were funded by the ERC-2014-CoG

'WEIGHTANDVALUE: Weight metrology and its economic and social impact on Bronze Age Europe, West and South Asia' [Grant no. 648055].

**Dr. Enrico Ascalone** is teaching at the Georg-August-Universität of Göttingen since 2017, after hosting several seminars in Milan, Messina, Palermo and Alep.

He is the author of numerous books on the Mesopotamia Civilization (2005), the Archaeology of Ancient Iran (2006 and 2015), the Eblaite Weighing System (2006), the Elamite Glyptic Art (2011) and the Archaeological Methodology (2001 and 2004). He has also published more than ninety studies principally focused to the Elamite cylinder during seals, the Bronze Age Iranian history, the Ancient Near Eastern Weighting Systems and the commercial role of the Iranian and Syrian sites Early and Middle Bronze Age periods.
